

Xiaocan Li

Last update on November 17, 2023

Department of Physics and Astronomy, Dartmouth College, 6127 Wilder Laboratory, Hanover, NH 03755-3528
✉ Xiaocan.Li@dartmouth.edu • ☎ +1-603-646-8129 • xiaocanli.github.io

Research Interests

Magnetic reconnection

Particle acceleration mechanisms. Power-law formation. Particle transport. Plasma energization. Turbulence generated by 3D magnetic reconnection. Turbulent reconnection. Reconnection rate. Relativistic reconnection. Reconnection-driven solar jets.

Solar flares and solar eruptions

Large-scale particle acceleration and transport. Nonthermal emissions produced by the energetic particles. The origins of solar energetic particles. Magnetic reconnection, termination shocks, and plasma turbulence in solar flares.

Particle acceleration and transport

Transport theory and modeling. Shock acceleration. Turbulence acceleration. Stochastic processes.

Education

The University of Alabama in Huntsville

HUNTSVILLE, AL, USA

Ph.D. in Space Science

2011 – 2016

Dissertation: “Numerical Simulation of Particle Acceleration during Solar Flares”. Advisor: Gang Li

Peking University

BEIJING, CHINA

M.S. in Space Physics

2008 – 2011

Tongji University

SHANGHAI, CHINA

B.S. in Surveying and Mapping Engineering

2004 – 2008

Research Experiences

Dartmouth College

HANOVER, NH

Research Scientist

Feb. 2022 – present

I study particle and transport processes in solar physics and astrophysics using MHD + transport equation and particle-in-cell simulations, develop theories of particle acceleration processes, and compare the results with emission observations.

Dartmouth College

HANOVER, NH

Research Associate B

Feb. 2020 – Jan. 2022

I studied magnetic reconnection and particle energization processes in solar physics and astrophysics. Specifically, I performed PIC simulations to investigate the reduction of the reconnection rate in high- β plasmas and particle acceleration in high- σ relativistic plasmas, and I used MHD + transport equation to study particle acceleration and transport in solar flares. Mentor: Yi-Hsin Liu

Los Alamos National Laboratory

LOS ALAMOS, NM

Postdoctoral Research Associate

Feb. 2017 – Feb. 2020

I studied particle acceleration during magnetic reconnection in solar flares. Specifically, I explored the primary particle acceleration mechanisms using kinetic particle-in-cell simulations, developed particle acceleration models, solved the models coupled with MHD simulations, and compared the results with solar flare observations. Mentors: Fan Guo, Hui Li

The University of Alabama in Huntsville

HUNTSVILLE, AL

Postdoctoral Research Assistant

Sept. 2016 – Jan. 2017

I studied the interaction of plasma with electric tether using kinetic particle-in-cell simulations. Mentor: Gary Zank

Los Alamos National Laboratory

LOS ALAMOS, NM

Visiting Student

May 2014 – Aug. 2016

I studied particle energization during magnetic reconnection using the particle-in-cell code VPIC. I focused on the roles of particle guiding-center drift motions, flow compression and shear, and pressure anisotropy in particle energization. Mentors: Fan Guo, Hui Li

The University of Alabama in Huntsville

HUNTSVILLE, AL

Graduate Research Assistant

May 2012 – Aug. 2016

My dissertation was on numerical simulations of particle acceleration during solar flares. I developed a test-particle code to track charged particles in chaotic and turbulent magnetic fields. I used the kinetic particle-in-cell code VPIC to study particle acceleration during magnetic reconnection. Advisor: Gang Li

Los Alamos National Laboratory/Center for Nonlinear Studies

LOS ALAMOS, NM

Graduate Research Assistant

Jun. 2013 – Aug. 2013

I studied the magnetic field amplification in supernova remnant shocks using MHD simulations and particle acceleration in the shock downstream by solving the Parker transport equation coupled with the MHD fields. Mentors: Fan Guo, Hui Li

Peking University

BEIJING, CHINA

Graduate Research Assistant

Sept. 2009 – Jun. 2011

I studied electron transport using the Monte Carlo code Geant4. Advisor: Hongfei Chen

Honors and Awards

Postdoctoral Distinguished Performance Award Honorable Mention, Los Alamos National Lab	2019
NASA Earth and Space Science Fellowship (NESSF), NASA	2013 – 2016
SPD Studentship Award, Solar Physics Division, AAS	2015
DPP Student Travel Grant Award, Division of Plasma Physics, APS	2014

Teaching and Mentoring Experiences

Teaching:

<i>Graduate Teaching Assistant</i> , Department of Physics, The University of Alabama in Huntsville	Spring 2012
Grading for PH421 (Thermal & Statistical Physics)	
<i>Graduate Teaching Assistant</i> , Department of Physics, The University of Alabama in Huntsville	Fall 2011
Grading for PH113 (General Physics with Calculus III) and teaching PH114 (General Physics Labs)	

Tutorial:

<i>A tutorial on running reconnection simulations using VPIC</i>	2021
Material: https://github.com/xiaocanli/vpic_reconnection_tutorial	
<i>Reconnection Simulation using Athena++</i>	2022
Material: https://github.com/xiaocanli/athena_reconnection	
<i>A tutorial on using stochastic-parker</i>	2022
Material: https://stochastic-parker.readthedocs.io/en/latest/usage.html	

Mentoring/Technical Support:

At Dartmouth College

<i>Shan-Chang Lin</i> , Graduate	2020 – present
Helping with simulations and assisting in studying reconnection rate and magnetotail reconnection	
<i>Sarah Peery</i> , Graduate	2020 – present
Helping with simulations and assisting in studying relativistic reconnection	
<i>Matthew Goodbred</i> , Undergraduate	2020 – present
Helping with simulations and assisting in studying magnetic reconnection	

At LANL

<i>Giulia Murtas</i> , Postdoc	2022 – present
Assisting and collaborating in modeling particle acceleration and transport in large-scale reconnection	
<i>Joshua Goodwill</i> (<i>Graduate@University of Delaware</i>), Summer Intern	2023 – present
Assisting in studying Kelvin-Helmholtz instability using kinetic simulations	
<i>Grant Johnson</i> (<i>Graduate@Princeton University</i>), Summer Intern	2021 – 2022
Assisting in studying particle acceleration in magnetic reconnection	
<i>Senbei Du</i> (<i>Graduate@The University of Alabama in Huntsville</i>), Visiting Student	2016 – 2019
Helping with simulations and assisting in studying plasma energization in magnetic reconnection	

Dylan Ma (<i>Los Alamos High School</i>), Intern	2018 – 2019
Helping with debugging, running simulations, and analyzing simulation results	
At UAH	
David Fink (<i>Undergraduate@Emory University</i>), UAH & MSFC REU	2012
Helping with analyzing solar wind observations data	

Grants & Computing Allocations

Research Grants:

Co-I, <i>NASA Heliophysics Theory, Modeling and Simulations (HTMS)</i> , \$150k	2023 – 2026
“Particle Acceleration and Transport in Coronal Solar Flare Regions” (PI: Fan Guo)	
Co-I, <i>NASA Heliophysics Supporting Research (HSR)</i> , \$150k	2023 – 2026
“Magnetic flux ropes and magnetic loops in Earth’s plasma sheet: their properties and role in particle energization” (PI: Weijie Sun)	
PI, <i>NASA Living With a Star Science (LWS)</i> , \$647k	2021 – 2025
“The Acceleration of Energetic Particles in Solar Flares and Their Transport in Solar Eruption Regions”	
Institutional PI, <i>NSF Astronomy & Astrophysics Grants Program (AAG)</i> , \$178k	2021 – 2024
“Achieving a New Understanding of Solar Flare Termination Shocks” (PI: Fan Guo)	
Co-I, <i>NASA Heliophysics Supporting Research (HSR)</i> , \$167k	2021 – 2024
“Exploring Time-Dependent Ionization in Solar Eruption Models Combining with Energetic Particle Acceleration” (PI: Chengcai Shen)	
Institutional PI, <i>Purdue University–NASA prime</i> , \$23k	2021 – 2022
“Radiation and Polarization Signatures From 3D Relativistic Turbulent Magnetic Reconnection In Blazars” (PI: Dimitrios Giannios)	
Institutional PI, <i>LANL–NASA prime</i> , \$116k	2020 – 2023
“Exploring Energy Release and Conversion in Solar Eruptive Events Using Multi-wavelength Observations and Numerical Simulations” (PI: Bin Chen)	

Computing Allocations:

PI, NERSC’s ERCAP, 7k CPU node-hours and 2.5k GPU node-hours/year	2023
PI, NERSC’s ERCAP (Energy Research Computing Allocations Process), ~25k node-hours/year	2022
Co-I, TACC’s Large-Scale Community Partnerships (LSCP) project, 890k node-hours/year	2021 – 2023
PI, Institutional Computing Project 2019, Los Alamos National Lab, 10M core-hours	2019 – 2020
PI, Institutional Computing Project 2018, Los Alamos National Lab, 8.8M core-hours/year	2018 – 2020
Co-I, NERSC’s High-Impact Science at Scale program 2018, 60M core-hours	2018 – 2019

Professional and Community Service

Review Activities:

Guest Editor, <i>Frontiers in Astronomy And Space Sciences</i>	2021 – present
Referee, 50 papers for 21 journals	2016 – present
ApJ, ApJL, ApJS, PRL, PRX, MNRAS, JGR, GRL, PoP, Reviews of Modern Plasma Physics, Communications Physics, Frontier, Astrophysics and Space Sciences, Solar Physics, Plasma Science and Technology, Galaxies, Sensors, Atmosphere, Fluids, Entropy, Universe	
Panelist, 2 NASA grant panel, 1 NSF grant panel	2022, 2023
Mail-in Reviewer, 1 grant proposal submitted to Swiss National Science Foundation (SNSF)	2023
Mail-in Reviewer, 1 application submitted for Secretary’s Research Prizes of Smithsonian Institute	2023
Mail-in Reviewer, 2 grant proposals submitted to NASA funding programs	2019, 2020
Judge, Outstanding Student Paper Award of the AGU Fall Meeting	2017 – 2019, 2021 – 2022

Meeting Activities:

Session Chair, AGU Fall Meeting at San Francisco, CA	2023
Topic: “Magnetic Reconnection: Connecting Ideas from Observations, Experiments, Models, and Theory”	

Session Convener, <i>AGU Fall Meeting at Chicago, IL</i>	2022
Topic: "Magnetic Reconnection: Connecting Ideas from Observations, Experiments, Models, and Theory"	
Early Career Convener, <i>AGU Fall Meeting at Chicago, IL</i>	2022
Topic: "Energetic Particles from the Sun to the Heliosphere"	
Session Convener, <i>AGU Fall Meeting at San Francisco, CA (19), Online (20)</i>	2019-2020
Topic: "Plasma Energization, Particle Acceleration, and High-Energy Emission in Solar Flares"	
Organizer, <i>One-week workshop at Los Alamos, NM</i>	2019
Topic: "Magnetic Reconnection and Particle Acceleration in Solar Flares"	
Session Chair, <i>AGU Fall Meeting at Washington, D.C.</i>	2018
Topic: "Plasma Energization, Particle Acceleration, and High-Energy Emission in Solar Flares"	

Computer Skills

HPC experience at NERSC, LANL, and TACC	2013 – present
Languages: Python, Fortran, C, C++, and Julia	
Parallelization: MPI, OpenMP, CUDA, and Kokkos	
Building: Make and CMake	
Debugging: GDB, Valgrind, and Arm DDT	
Data analysis and visualization: Python libraries, ParaView, IDL	
Others: HDF5, FFTW3	
Numerical codes: Athena/Athena++ MHD code, VPIC code, WarpX PIC code, test-particle code (https://git.io/fxQYy), stochastic code to solve the Parker transport equation (https://git.io/fxQY1)

Invited Talks

16. Understanding Particle Acceleration during Solar Flares through Integrated Modeling and Observations, 2023 AGU Fall Meeting, Dec. 11th, 2023, San Francisco, CA.
15. Modeling Particle Acceleration and Transport in Solar Flares and Solar Eruption Regions, *EOVSA Data and GX Simulator Modeling Camp & FASR Workshop 2023*, Jan. 11th, 2023, Newark, NJ.
14. Modeling Electron Acceleration and Transport in Magnetic Reconnection *AOGS 19th Annual Meeting*, Aug. 1st, 2022, Online
13. Thermal and Nonthermal Partition in Nonrelativistic Magnetic Reconnection *Magnetic Reconnection Workshop 2022*, May. 19th, 2022, Monterey, CA.
12. The acceleration of charged particles in nonrelativistic magnetic reconnection *2021 AGU Fall Meeting*, Dec. 16th, 2021, Online
11. Formation of Power-law Electron Energy Spectra in 3D Low- β Magnetic Reconnection, *62nd Annual Meeting of APS DPP*, Nov. 9, 2020, Online
10. Power-Law Generation of Accelerated Particles in 3D Reconnection, *4th Asia-Pacific Conference on Plasma Physics*, Oct. 28, 2020, Zoom online
9. Large-scale particle acceleration during magnetic reconnection in solar flares. *Solar Physics Webinar of Global Reach—SolFER Colloquium*, Aug. 21, 2020, Webex online
8. The formation of power-law energy spectrum in low- β magnetic reconnection. *Magnetic Reconnection and Particle Acceleration in Solar Flares*, Mar. 18-20, 2019, Los Alamos, NM
7. The formation of power-law energy spectrum in 3D low- β magnetic reconnection. *The 18th Annual International Astrophysics Conference*, Feb. 18-22, 2019, Pasadena, CA
6. The Roles of Fluid Compression and Shear in Particle Energization during Magnetic Reconnection. *Particle Transport and Energization in Turbulent Plasmas*, April 24-27, 2018, Zhuhai, Guangdong, China.
5. The Roles of Fluid Compression and Shear in Particle Energization during Magnetic Reconnection. *The 17th Annual International Astrophysics Conference*, March 5-9, 2018, Santa Fe, NM.
4. The Role of Fluid Compression in Particle Energization during Magnetic Reconnection. *2017 AGU Fall Meeting*, New Orleans, LA.

3. The Role of Fluid Compression in Particle Energization during Magnetic Reconnection. *The 16th Annual International Astrophysics Conference*, March 6-10, 2017, Santa Fe, NM
 2. Nonthermally Dominated Electron Acceleration during Magnetic Reconnection in a Low-beta Plasma. *Plasma Energization: Exchanges between Fluid and Kinetic Scales*, May 4-6, 2015, Los Alamos, NM.
 1. Particle acceleration in reconnection: a view from electric current, *Meso-scale Plasma Dynamics and Energetic Particles: Applications to Laboratory, Space, and Astrophysical Plasmas*, June 30 – July 1, 2014, Los Alamos, NM.
-

Other Talks

26. Turbulence and Associated Particle Acceleration and Transport in 3D Magnetic Reconnection, *65th Annual Meeting of APS DPP*, Nov. 2nd, 2023, Virtual
25. Modeling particle acceleration and transport in 3D solar flare regions, *SDU Qingdao Forum on Energy Particles and Radio Radiation*, Oct. 26th, 2023, Virtual
24. Turbulence Properties in 3D Magnetic Reconnection: Implications for Particle Acceleration and Transport, *Friends-of-Magnetosphere (FoM) seminar at LASP*, Oct. 17th, 2023, Online
23. Modeling Particle Acceleration and Transport during Solar Flares, *Seminar at Space Science Center @ University of New Hampshire*, Sept. 27th, 2023
22. Modeling Electron Acceleration and Transport in 3D Solar Flare Regions, *HSR workshop at NJIT*, Aug. 29th, 2023
21. Modeling Particle Acceleration and Transport in Solar Flares, *Seminar at National Space Science Center*, May 5th, 2023, Online
20. Modeling Particle Acceleration and Transport in Solar Flare Magnetic Reconnection Region, *2022 AGU Fall Meeting*, Dec. 16th, 2022, Chicago, IL
19. A Model for Nonthermal Particle Acceleration in Relativistic Magnetic Reconnection, *64th Annual Meeting of APS DPP*, Oct. 18th, 2022, Online
18. Modeling Large-scale Electron Acceleration and Transport in Solar Flare Magnetic Reconnection Region, *2021 AGU Fall Meeting*, Dec. 14th, 2021, Online
17. Modeling Large-scale Electron Acceleration in Solar Flare Magnetic Reconnection Region, *IPMU Workshop on "Particle Acceleration in Solar Flares and the Plasma Universe – Deciphering its features under magnetic reconnection"*, Nov. 18th, 2021, Online
16. A model for nonthermal particle acceleration in magnetic reconnection, *63rd Annual Meeting of APS DPP*, Nov. 9th, 2021, Online
15. Turbulence properties relevant to particle acceleration and transport in 3D reconnection, *MMS Community Workshop*, Oct. 20th, 2021, Waterville Valley, NH
14. Modeling Large-scale Electron Acceleration Associated with Magnetic Reconnection, *SolFER Spring 2021 Meeting*, May 25th, 2021, Online
13. Power-law Index of Energy Spectrum in Magnetically Dominated Systems, *62nd Annual Meeting of APS DPP*, Nov. 11, 2020, Online
12. Power-law formation of nonthermal electrons in low- β reconnection. *MMS telecom*, July 28, 2020, online Webex meeting
11. Power-law formation in 3D low- β magnetic reconnection. *DRIVE Science Center Collaboration on Solar Flare Energy Release (SolFER), Group 3*, July 9, 2020, online Zoom meeting
10. Large-scale particle acceleration during solar flare reconnection. *18th RHESSI Workshop*, May 28-June 1, 2019, Minneapolis, MN
9. Particle acceleration in compressible reconnection layer. *60th Annual Meeting of the APS Division of Plasma Physics*, November 5–9, 2018; Portland, Oregon
8. Particle Acceleration during Magnetic Reconnection in Solar Flares. *Dartmouth College*, Oct. 23, 2018, Hanover, NH.
7. Particle acceleration mechanisms during magnetic reconnection. *National Space Science Center*, May 31, 2018, Beijing, China.

6. Particle acceleration mechanisms during magnetic reconnection. *Beihang University*, May 30, 2018, Beijing, China.
5. Particle acceleration mechanisms during magnetic reconnection. *Shandong University Weihai Campus*, May 23, 2018, Weihai, Shandong, China.
4. Particle acceleration mechanisms during magnetic reconnection. *Purple Mountain Observatory*, May 16, 2018, Nanjing, Jiangsu, China.
3. Nonthermal particle acceleration in 2D and 3D nonrelativistic magnetic reconnection. *59th Annual Meeting of the APS Division of Plasma Physics*, October 23-27, 2017, Milwaukee, WI
2. The role of fluid compression in particle energization at the reconnection site during solar flares. *RHESSI 16th Workshop*, June 19-24, 2017, Boulder, CO
1. Nonthermally Dominated Particle Acceleration during Magnetic Reconnection in a Low-beta Plasma. *14th RHESSI Workshop*, July 12 – 15, 2015, Newark, NJ
